MORNINGSTAR OVERALL RATING™†

Among 84 Convertible Bond - Global Funds

The fund's Class I USD Accumulating shares had 5 stars for 3 years, 5 stars for 5 years, and 5 stars for 10 years out of 84, 79 and 45 Convertible Bond - Global Funds, respectively, for the period ended 31/7/21.

OVERVIEW

The fund invests in global convertible securities with the aim of balancing risk/reward while providing growth and income.

KEY FEATURES

- » Provides broadly diversified exposure to the global convertible bond universe.
- » Leverages more than 40 years of research in convertible security investing.
- » Seeks to provide upside participation in equity markets with less exposure to downside than an equity-only portfolio over a full market cycle
- » Blends global investment themes and fundamental research via active management

PORTFOLIO FIT

Consisting of convertible securities that can participate in upside equity movements with potentially limited downside exposure, the fund can provide a means to manage risk in conjunction with an equity allocation. The fund can also serve a role within a fixed-income allocation, as convertibles have performed well during periods of rising interest rates and inflation.

*Morningstar Ratings™ are based on risk-adjusted returns for Class I shares and will differ for other share classes. Morningstar Ratings based on a risk-adjusted return measure that accounts for variation in a fund's monthly historical performance (reflecting sales charges), placing more emphasis on downward variations and rewarding consistent performance.

Within each asset class, the top 10%, the next 22.5%, 35%, 22.5%, and the bottom 10% receive 5, 4, 3, 2, or 1 star, respectively. Each fund is rated exclusively against U.S. domiciled funds. Calamos Active Management and Global Perspective Seek to Maximize the Potential Benefits of Convertibles

Defensive Equity. For more than 40 years, Calamos has advocated convertible securities for investors seeking upside participation in equity markets with less downside exposure than an equity-only portfolio over a full market cycle.

Enhanced Fixed Income. Convertibles can diversify fixed income and hedge the risk of rising rates.

Global Diversification. Because the opportunity sets differ across economies, global convertibles can provide improved prospects for alpha generation, downside protection and income.

Lane, Dublin 2, D02 F206. GemCap acts as both management company and global distributor to GemCap Investment Funds (Ireland) plc. GemCap UK Limited (FRN 924419) is an appointed representative of Connexion Capital LLP (FRN 480006), which is authorised and regulated by the Financial Conduct Authority and provides distribution oversight services to GemCap acting as global distributor and is responsible for the oversight of all distribution arrangements for the sub-fund.

This is a marketing communication. Please refer to the Supplement, the Prospectus, any other offering document and the relevant key investor information document (KIID) in relation to the Fund before making any final investment decision.

A copy of the English version of the Supplement, the Prospectus, and any other offering document and the KIID is available at www.gemcapital.ie and <http://www.calamos.com/funds/ucits>. As required under national rules, the KIIDs and any other applicable documents are also available in the official language of the relevant jurisdiction where the Fund is marketed, or in another language accepted by the national competent authorities of that jurisdiction.

A summary of investor rights associated with an investment in the Fund is available in English at www.gemcapital.ie. A decision may be taken at any time to terminate the arrangements for the marketing of the Fund in any jurisdiction in which it is currently being marketed. In such circumstances, Shareholders in affected EEA Member State will be notified of any decision to terminate marketing arrangements in advance and will be provided the opportunity to redeem their shareholding in the Company free of any charges or deductions for at least 30 working days from the date of such notification.

IMPORTANT RISK INFORMATION. Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings, and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Average annual total return measures net investment income and capital gain or loss from portfolio investments as an annualised average. All performance shown assumes reinvestment of dividends and capital gains distributions. The Fund also offers Class C and X shares, the performance of which may vary. Performance shown reflects the management fee.

Returns greater than 12 months are annualised. All performance shown assumes reinvestment of dividends and capital gains distributions. Sources for performance data: Calamos Advisors LLC, RBC Investor Services Ireland Limited ("RBC") and Mellon Analytical Solutions, LLC.

The Refinitiv Global Convertible Bond Index is designed to broadly represent the global convertible bond market. The MSCI World Index is a market capitalisation weighted index representative of the market structure of developed market countries in North America, Europe, and the Asia/Pacific region. Morningstar Convertible Bond - Global funds invest principally in convertible securities of issuers from around the world. Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Alpha is the measurement of performance on a risk adjusted basis. A positive alpha shows that performance of a portfolio was higher than expected given the risk. A negative alpha shows that the performance was less than expected given the risk. Beta is a historic measure of a fund's relative volatility, which is one of the measures of risk; a beta of 0.5 reflects 1/2 the market's volatility as represented by the fund's primary benchmark, while a beta of 2.0 reflects twice the volatility. R-squared is a mathematical measure that describes how closely a security's movement reflects movements in a benchmark. Sharpe ratio is a calculation that reflects the reward per each unit of risk in a portfolio. The higher the ratio, the better the portfolio's risk-adjusted return is. Standard deviation is a measure of volatility.
